

R&D Project Portfolio 2026

TechBond Industries Research & Development Division

Document Classification: Confidential Last Updated: October 2026

Portfolio Overview

2026 R&D Investment

- Total Budget: €8.5M
- Headcount: 45 FTE
- Active Projects: 12
- Patent Applications: 4

Strategic Focus Areas

- Electric Vehicle Adhesives
- Sustainable Formulations
- Next-Generation Performance
- Process Optimization

Active Projects

Project 1: SecureSeal EV Series

Status: Completed - Launching Nov 2026

Field	Details
Objective	Develop EV battery adhesive line
Budget	€1.8M
Duration	18 months
Team Size	8 FTE
Stage	Commercialization

Deliverables:

- EV-100: Thermal interface (Complete)
- EV-200: Structural bonding (Complete)
- EV-300: Potting compound (Complete)

Project 2: FlexiGrip Next-Gen

Status: In Development

Field	Details
Objective	Ultra-flexible electronics adhesive
Budget	€1.2M
Duration	24 months
Team Size	5 FTE
Stage	Prototype Testing

Key Innovations:

- 50% improvement in flexibility
- Low-temperature cure (< 80°C)
- Improved thermal cycling resistance

Timeline:

- Prototype: Complete
 - Customer testing: Q1 2026
 - Launch: Q3 2026
-

Project 3: Bio-Based Adhesives

Status: Early Development

Field	Details
Objective	Develop sustainable adhesive from renewable sources
Budget	€950K
Duration	36 months
Team Size	4 FTE
Stage	Formulation Development

Target Specifications:

- 60%+ bio-based content
- Performance parity with petroleum-based

- Competitive pricing (+ 10-15% max)

Project 4: Rapid Cure Technology

Status: In Development

Field	Details
Objective	Reduce cure time by 50%
Budget	€800K
Duration	18 months
Team Size	3 FTE
Stage	Lab Testing

Applications:

- High-speed automotive lines
- Consumer electronics assembly
- Repair and maintenance

Project 5: Smart Adhesive (Sensing)

Status: Research Phase

Field	Details
Objective	Adhesive with embedded sensing capability
Budget	€600K
Duration	24 months
Team Size	2 FTE
Stage	Concept Validation

Potential Applications:

- Structural health monitoring
 - Bond integrity verification
 - Predictive maintenance
-

Pipeline Summary

Stage		Projects	Investment
Research		2	€1.1M
Development		3	€2.95M
Testing		4	€2.8M
Launch Ready		3	€1.65M

2026 Project Priorities

- 1. EV Adhesives Phase 2 - Next-gen thermal materials
- 2. Sustainability Initiative - Bio-based expansion
- 3. Aerospace Qualification - BondMax 700 certification
- 4. Digital Formulation - AI-assisted development
