

Product Launch Plan

SecureSeal EV Series

Adhesives for Electric Vehicle Battery Manufacturing

Document Version: 1.0 **Launch Date:** November 1, 2025 **Product Marketing Owner:** Jennifer Walsh

Executive Summary

The SecureSeal EV Series represents TechBond's strategic entry into the electric vehicle adhesive market. This product line addresses the unique bonding challenges in EV battery assembly, offering superior thermal management and structural integrity.

Product Portfolio

SecureSeal EV-100

Application: Thermal Interface Bonding

- Thermally conductive adhesive
- Thermal conductivity: 2.5 W/mK
- Gap filling capability
- Excellent heat dissipation

SecureSeal EV-200

Application: Structural Cell Bonding

- High-strength structural adhesive
- Crash-resistant formulation
- Vibration dampening properties
- UL94 V-0 flame rating

SecureSeal EV-300

Application: Potting and Encapsulation

- Two-component potting compound
 - Electrical insulation properties
 - Chemical resistance
 - IP67 sealing capability
-

Market Opportunity

Market Size

- Global EV adhesives market: €2.8B (2025)
- CAGR: 28% (2025-2030)
- European market: €680M

Target Segments

1. OEM battery manufacturers
2. Tier 1 automotive suppliers
3. Battery module assemblers
4. EV startups

Competitive Landscape

Competitor	Market Share	Our Differentiation
AdhesiveCo	25%	+ 15% thermal conductivity
BondMaster	18%	Faster cure time
ChemBond	12%	Superior flexibility

Launch Timeline

Date	Milestone	Owner
Oct 15	Final formulation approval	R&D
Oct 20	Sales training materials	Product Marketing
Oct 25	Website product pages	Digital Marketing
Oct 28	Press release finalized	PR
Nov 1	OFFICIAL LAUNCH	All
Nov 1-7	Customer email campaign	Marketing
Nov 15-18	AutoExpo showcase	Events
Nov 30	Post-launch review	All

Go-to-Market Strategy

Pricing Strategy

Product	List Price	Volume Discount
EV-100	€385/10kg	Up to 20%
EV-200	€425/10kg	Up to 20%
EV-300	€365/10kg	Up to 18%

Channel Strategy

- Direct sales to OEMs (primary)
- Strategic distributors (secondary)
- Technical partnerships with equipment OEMs

Marketing Plan

1. Trade show presence (AutoExpo)
2. Technical webinar series
3. Case study development
4. LinkedIn B2B campaign
5. Industry publication articles

Sales Enablement

Target Accounts (Priority List)

1. TierOne Motors - Active opportunity
2. EVMotors - Sample testing
3. MegaAuto - EV line expansion
4. BatteryTech GmbH - New prospect
5. ElectroDrive - RFQ pending

Sales Training

- Product technical training: Oct 20
- Competitive positioning: Oct 22
- Demo procedures: Oct 25
- Pricing and discounting: Oct 28

Success Metrics

Year 1 Targets

Metric	Target
Revenue	€2.5M
New Accounts	15
Market Share	5%
Customer Satisfaction	> 4.5/5
