What this is: A snapshot of recent customer-facing and internal emails from the TechBond Sales & Quality inboxes, exported for offline use. Upload this single file to an agent (or NotebookLM) and it can answer questions about any conversation below — no live Gmail connection required.

Coverage: 9 emails · January 2026 · Sales, Customer, and Quality threads.

Email 1 — RE: BondMax 500 bulk order inquiry

- **From:** purchasing@autoparts-inc.com (Michael Torres, Procurement Manager, AutoParts Inc.)
- **To:** sales@techbond.com
- **Date:** January 2, 2026
- **Labels:** Sales, Hot Lead, BondMax 500

Hi TechBond Sales Team,

Following up on our initial conversation about the BondMax 500 industrial adhesive. We're looking to place a bulk order for our automotive assembly line. Our requirements:

- **Quantity:** 500 units (25kg drums)
- **Delivery:** Within 4 weeks to our Detroit facility
- **Application:** Metal-to-metal bonding on chassis components

Could you please provide: (1) volume pricing for this quantity, (2) the technical data sheet for BondMax 500, (3) lead-time confirmation, and (4) shipping options to Michigan, USA.

We've been using a competitor product but are interested in switching due to your reputation for quality. Our engineering team has already tested samples and approved the product.

Looking forward to your quote.

Best regards, **Michael Torres** · Procurement Manager · AutoParts Inc. · +1 (313) 555-0142

Email 2 — Volume discount request — Q1 reorder

- **From:** procurement@megaauto.com (Lisa Chen, Senior Buyer, MegaAuto Group)
- **To:** sales@techbond.com
- **Date:** January 6, 2026
- **Labels:** Sales, Key Account, SecureSeal

Hello TechBond,

MegaAuto is planning our Q1 reorder of SecureSeal 100. Based on our 2025 volumes (we purchased 18,000 kg last year), we'd like to discuss moving to the next pricing tier. We're forecasting **22,000 kg** for 2026.

Two questions before we commit:

1. What volume discount can you offer at the 22,000 kg level?
2. Can you confirm there are no open quality issues on the SecureSeal line? Our line manager flagged a viscosity comment from a colleague and wants reassurance before we scale up.

We value the partnership and want to grow it. Please advise.

Best, **Lisa Chen** · Senior Buyer · MegaAuto Group

Email 3 — Contract renewal — ChemCorp (expires Feb 28)

- **From:** anna.weber@chemcorp.de (Anna Weber, Category Manager, ChemCorp)
- **To:** sales@techbond.com
- **Date:** January 8, 2026
- **Labels:** Sales, Renewal, Action Needed

Dear TechBond team,

Our annual supply agreement for FlexiGrip and BondMax products **expires on February 28, 2026**. We'd like to renew for another 12 months.

Before signing, leadership has asked us to confirm: pricing stability for 2026, guaranteed lead times under 3 weeks, and a sustainability statement for our ESG report. Could you send a renewal proposal covering these points by **end of January** so we have time for internal sign-off?

Thank you, **Anna Weber** · Category Manager · ChemCorp GmbH

Email 4 — Sample request: SecureSeal EV for battery housing

- **From:** r.kumar@evmotors.com (Raj Kumar, R&D Engineer, EV Motors)
- **To:** technical-sales@techbond.com
- **Date:** January 9, 2026
- **Labels:** Sales, Sample, SecureSeal EV, New Product

Hi,

We saw the announcement for your new **SecureSeal EV series** and are very interested. We're designing a battery housing that needs an adhesive rated for thermal cycling and EV vibration standards.

Could you send **2 sample kits** to our Munich lab, plus the technical data sheet and any EV-specific test results you have? If testing goes well, this could become a platform-wide spec for our 2027 models.

Thanks, **Raj Kumar** · R&D Engineer · EV Motors

Email 5 — New lead from website: TierOne Manufacturing

- **From:** info@tierone-mfg.com (TierOne Manufacturing — via website form)
- **To:** sales@techbond.com
- **Date:** January 10, 2026
- **Labels:** Sales, New Lead, Inbound

New inquiry submitted through techbond.com/contact:

"We manufacture appliance components and are evaluating new structural adhesives. Interested in BondMax 500 and any food-safe options. Roughly 3,000 kg/year to start. Who can we talk to?" — Sandra Lee, Operations Director, TierOne Manufacturing

Auto-assigned to: Sales (EMEA). **Follow-up SLA: 48 hours.**

Email 6 — Competitor alert: AdheTech price drop

- **From:** marketing-intel@techbond.com (Market Intelligence)
- **To:** sales-team@techbond.com
- **Date:** January 7, 2026
- **Labels:** Internal, Competitive

Heads up team — our main competitor **AdheTech** announced a 12% price cut on their industrial adhesive line this week, clearly targeting automotive accounts. Expect questions from AutoParts and MegaAuto.

Talking points: emphasize our quality track record, technical support, and total cost of ownership (lower rework rates). Do **not** match on price reflexively — loop in your manager for any account at risk.

Email 7 — QUALITY INCIDENT NOTIFICATION (QI-2025-0087)

- **From:** quality@techbond.com (Stefan Braun, Quality Assurance Manager)
- **To:** quality-team@techbond.com; sales@techbond.com
- **Date:** January 3, 2026
- **Labels:** Operations, Quality, Urgent

Incident ID: QI-2025-0087 · Severity: Medium · Status: Under Investigation

During a routine quality check, a **viscosity deviation** was detected on Production Line 3 for **SecureSeal 100 batch SS-2025-892**.

Field	Information
Date detected	January 3, 2026
Product	SecureSeal 100
Batch	SS-2025-892
Affected quantity	2,000 kg
Specification	Viscosity 1800–2200 cP
Measured	2450 cP (11% above upper limit)

Immediate actions: Line 3 halted · batch quarantined (DO NOT SHIP) · raw-material samples sent for testing · equipment calibration check started.

Suspected root cause: Temperature control malfunction in mixing tank (alternative: raw-material variation from a new supplier batch).

Customer impact: Two orders may be delayed — **MegaAuto** and **ChemCorp**. Estimated €15K batch loss if not reworkable.

Required: Sales to notify affected customers of potential delay. Full report expected within 1 week.

Stefan Braun · Quality Assurance Manager · TechBond Industries

Email 8 — Lab test results: BondMax 500 (Batch TB-2025)

- **From:** lab@techbond.com (Dr. Maria Fischer, Lab Manager)
- **To:** quality@techbond.com; sales@techbond.com
- **Date:** January 5, 2026
- **Labels:** Operations, Lab, BondMax 500

Test report attached for **BondMax 500, Batch TB-2025**. Summary: **all parameters PASS**.

Test	Spec	Result	Verdict
Shear strength (steel)	> 12 MPa	14.8 MPa	✓ Pass
Full cure (25°C)	24 h	confirmed	✓ Pass
Service temp	– 40 to + 120°C	confirmed	✓ Pass

Viscosity (mixed)	2,500–3,500 cP	2,980 cP	✓ Pass
-------------------	----------------	----------	--------

This batch is **cleared for shipment**, including the AutoParts Inc. order. Full report: Lab-Test-Report-Batch-TB2025.

Dr. Maria Fischer · Lab Manager · TechBond R&D

Email 9 — Trade show: AutoExpo booth confirmed

- **From:** events@techbond.com (Emma Rodriguez, Marketing Events)
- **To:** sales-team@techbond.com; marketing@techbond.com
- **Date:** January 9, 2026
- **Labels:** Marketing, Events, AutoExpo

Good news — our **AutoExpo** booth (Hall 4, Stand B-12) is confirmed. We'll feature the **SecureSeal EV** launch and live BondMax demos. Sales: please send your target-customer meeting list by Friday so we can pre-book slots. Prep meeting is on the calendar this week. Full plan: Trade-Show-Playbook-AutoExpo.

Emma Rodriguez · Marketing Events · TechBond
