- Quality control and testing
- Storage and distribution
- Customer support

Quality Objectives

Objective	Target	Current
Customer complaints	< 10 per year	7 YTD
First-pass yield	> 98%	98.4%
On-time delivery	> 95%	94.2%
Supplier quality	> 99% conformance	99.1%
Audit findings (major)	0	0 YTD

Key Processes

1. Document Control

- All quality documents controlled in QMS system
- Version control and approval workflow
- Retention period: 7 years minimum

2. Incoming Inspection

- Raw material inspection per sampling plan
- Certificate of Analysis verification
- Quarantine until released

3. In-Process Control

- Critical control points identified
- Statistical process control (SPC)
- Operator training and certification

4. Final Inspection

- 100% batch testing per specification
- Certificate of Analysis generation
- Release approval by QA

5. Non-Conformance Management

- NC identification and documentation
- Root cause analysis
- Corrective and preventive actions
- Effectiveness verification

Quality Responsibilities

Role	Responsibilities
QA Manager	QMS oversight, audits, reporting
Lab Manager	Testing, method validation
Production Manager	Process control, operator training
Procurement	Supplier quality, incoming inspection
All Employees	Report quality issues, follow procedures

Audit Program

Internal Audits

- Frequency: Annual (all processes)
- Conducted by trained internal auditors
- Findings tracked to closure

External Audits

- Certification audits: Annual surveillance
- Customer audits: As requested
- Regulatory audits: As required

2025 Audit Schedule

Month	Audit Type	Area
Nov	ISO 14001/45001	EHS
Dec	Internal	Production
Dec	Internal	Laboratory

Continuous Improvement

Improvement Initiatives

1. Lean manufacturing implementation
2. Six Sigma projects
3. Employee suggestion program
4. Customer feedback analysis

Key Metrics Tracking

- Monthly quality review meetings
- Quarterly management review
- Annual QMS review
